April 2005

Located in southcentral Montana, Park County is Montana's 12th most populous with 15,791 residents, according to the 2004 Census Bureau estimates. Livingston, the county seat, is the state's 11th largest city with a population of 7,073, according to the 2003 Census Bureau estimates.

The county is a ranching, railroad, and tourist area and thousands of tourists each year travel through Livingston on their way to Yellowstone National Park. The table to the right shows Park County has 217 beef cattle ranches, the 17th largest in the state. The Yellowstone River flows through the beautiful Paradise Valley and into Livingston, providing fishing and floating opportunities.

Information on the inside table, Employment by Industry, Annual Averages for 2003, shows tourism is important to the area economy. Most of the tourism activity is due to Park County being a gateway to Yellowstone National Park. Manufacturing entails about seven percent of the private jobs. Two-thirds of the manufacturing jobs are in just three firms: a locomotive repair shop; a printing shop; and a furniture maker shop.

With nearly all of Yellowstone Park residing in Wyoming, and more job opportunities in Bozeman, about one-fifth of Park County's residents commute out of the county for employment (see commuter table on the right).

According to the U.S. Census Bureau, median income for Park County households in 2002 was \$32,350, compared to Montana's median income of \$34,105 for the same year. Median income is the average per household income in the county (no matter how many people live in the home); per capita income (inside table) is all income in the county divided by the number of people in the county.

According to the *Montana Almanac*, by authors Andrea Merrill and Judy Jacobson, the county was established in 1887 and named after Yellowstone National Park because of its proximity to the area. The authors add Livingston was named after Crawford, Charles, or Johnson Livingston, three former directors of Northern Pacific Railroad.

Be sure to check our location quotients for Park County on the website. Location quotients are a measure of the concentration of an industry's employment in Park County relative to the nation as a whole. A location quotient generally greater than 1 indicates that the industry is more concentrated in Park County than in the nation as a whole, while a location quotient less than 1 indicates it is less concentrated in Park County than in the nation as a whole.
